

In a quick service atmosphere, it is essential to have a POS system that is dependable and easy to use. HotSauce™ Quick Service is built specifically for your business operations. Whether you have an over-the-counter or a fast-casual operation, Hot Sauce™ Quick Service can provide you with the speed and power you need to excel over your competition.

## FEATURES

HotSauce™ Quick Service allows you to serve your guests promptly and increase order accuracy, while providing your management with various reporting tools to effectively manage your operations. Some of the features include:

- Automatically changes breakfast, lunch and dinner menus using the built in menu timer
- Approves credit cards quickly in two to three seconds using the HotSauce EVS via High Speed Internet
- Utilizes Cashier Banking along with dual cash drawer capabilities to effectively rotate cashiers during the same shift
- Drive-through management allows the orders to be queued when submitting the order, modifying the order, closing the order and bumping the order by utilizing one or more terminals
- Advanced kitchen printing features including delayed printing, kitchen ticket summary and consolidation of separately paid orders

Hot Sauce™ Technologies is a certified provider of Kitchen Display System (KOS) that gives you flexibility to route each menu item to various monitors in the kitchen directly from the HotSauce™ terminals. Once a food order has been entered into the HotSauce™ front end, the items are immediately displayed on the kitchen monitors. After the order has been prepared, it can be bumped off the screen using a touchscreen or bump pad. There is also a running timer to insure that each order is being put out in a timely manner.

HotSauce™ technicians will work with you and your staff to optimize the Quick Service system to accommodate your dynamic business needs.
